## Princess and the pea

Parents of toilet-training toddlers know all too well the hassle of changing wet sheets in the middle of the night. Brolly Sheets promises to make this tricky stage less of a nightmare. Invented by a Sydney mum, Brolly Sheets save you time because you don't have to completely strip the bed. With cotton top and PVC bottom, it slips over the sheet and tucks under the mattress. Go to [www.brollysheets.com.au](http://www.brollysheets.com.au) for details.

They cost \$40 for a single and \$49 for a king single.
